1. Introduction

The HAAB Training Management Platform is where HAAB runs its aviation training business. Training Administrators run it day to day: they build the catalogue, schedule programmes, register and confirm trainees, oversee attendance and assessments, finalise and release results, issue certificates and keep compliance and documents in order. This manual is for **Training Administrators**.

1.1 What the platform does for you

- **Courses and programmes:** keep the catalogue, schedule each run of a course with sessions, rooms and instructors, and see programmes grouped by client.
- **People:** add trainees and client organisations, register people one by one or from an Excel list, and handle account requests.
- **Registrations:** confirm places, manage the waiting list and cancel with a reason.
- **Attendance and assessments:** oversee attendance, build assessments, manage the question bank and mark written answers.
- **Results and certificates:** finalise results, release them, issue, reissue, renew or revoke certificates.
- **Compliance, documents and reports:** see who is up to date, manage documents and export reports.
- **To do list and close-out checklist:** each home page and programme tells you the next step.

1.2 What you can and cannot do

You can do everything above across all clients. You **cannot** record payments or change settings: payments belong to Finance and settings to the Super Administrator. You can read invoices and see settings, but not change them. You also cannot delete records. Only a Super Administrator sees Delete buttons. The person who marks a trainee's work cannot be the one who finalises that trainee's result.

1.3 Finding what you need

If you want to...	Go to
Sign in for the first time	Getting started (see 2.2)
Read the dashboard and your To do list	The dashboard (see 4.1)
Set up a course	Courses (see 4.2)
Create and run a programme	Programmes (see 4.3)
Add trainees and clients	Trainees and clients (see 4.4)
Confirm places and handle the waiting list	Enrolments (see 4.5)
Oversee attendance	Attendance (see 4.6)
Assessments and marking	Assessments (see 4.7)
Finalise and release results	Results (see 4.8)
Issue or revoke a certificate	Certificates (see 4.9)

If you want to...	Go to
Check compliance, documents and reports	Compliance (see 4.10), documents (see 4.11) and reports (see 4.12)
Import questions or register trainees from files	Appendix A and Appendix B
Use the platform on a phone or tablet	Chapter 5
Fix a problem	Chapter 6

1.4 Conventions used in this manual

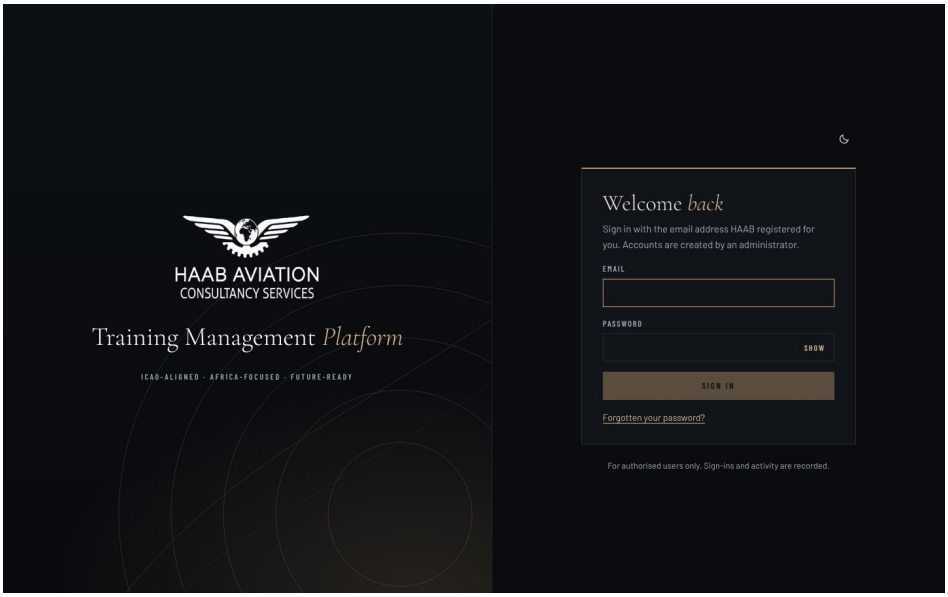

- **Bold text** is the name of a button, menu item, tab or field exactly as it appears on screen.
- Menu paths are written with an arrow: **Courses → Catalogue** means open the **Courses** menu, then choose **Catalogue**.
- Coloured boxes carry extra information: a green **Tip**, a blue **Note**, an orange **Important** warning and a gold **Rule** that explains why the platform behaves as it does.
- Screenshots show demonstration data. Names, amounts and dates on your screen will differ.

> **NOTE**
> The platform is invite-only. Your account is created by a Super Administrator, and you set your own password from the invitation email.

2. Getting started

2.1 Opening the platform

Open the platform address that HAAB gave you in any modern browser (Chrome, Edge, Safari or Firefox). No software needs to be installed. The platform also works as an app on a phone, described in chapter 5.

The sign-in page

2.2 Your first sign-in

When HAAB creates your account you receive an invitation email. The link in it is personal and works once.

1. Open the invitation email from HAAB and select the link in it.
2. Choose a password of **at least 12 characters**. A long phrase you can remember is better than a short complicated one.
3. Select **Set password**. You can then go to the sign-in page and sign in.

> **TIP**
> If the invitation does not arrive within a few minutes, check your spam or junk folder, then ask your administrator to send a new link.

2.3 Signing in each time

1. Open the sign-in page.
2. Type your email address and password.
3. Select **Sign in**.
4. If two-step sign-in is switched on for your role, enter the six-digit code from your authenticator app (see 2.6).

For your protection, sessions end automatically after a while, so you may occasionally be asked to sign in again. The platform also limits repeated sign-in attempts. If you are blocked after several wrong passwords, wait a few minutes and try again.

> **EVERY EMAIL HAS A SIGN-IN LINK**
> Emails from the platform (confirmations, results, certificates, reminders) end with a **Sign in** link to the platform, so you can get straight back in from any notice.

2.4 Forgot your password

1. On the sign-in page select **Forgotten your password?**.
2. Enter your email address and select **Send me a link**.
3. Open the email, select the link and choose a new password of at least 12 characters.

For security the platform always says "if the account exists, an email has been sent", whether or not the address is registered.

2.5 Asking for an account

If HAAB has switched self-registration on, the sign-in page shows **Request an account**. Complete the short form (full name, email, and optionally phone and employer) and select **Send request**. A HAAB administrator reviews each request. When it is approved you receive an email with a link to choose your password, as described in 2.2. Nobody can use the platform before approval. If the option is not shown, HAAB creates accounts for you.

2.6 Two-step sign-in (optional)

Two-step sign-in adds a second proof of identity, a six-digit code from an authenticator app on your phone (for example Google Authenticator, Microsoft Authenticator or Authy). It is **off by default**. Anyone can switch it on for their own account, and the Super Administrator can require it for chosen roles.

1. Select your name (top right) and choose **My profile**, or open **My profile** from the menu.
2. In the **Two-step sign-in** card select **Turn on**.
3. Scan the QR code with your authenticator app.
4. Type the six-digit code the app shows and select **Confirm**.

To switch it off again, select **Turn off** on the same card. This is not possible when HAAB requires it for your role.

> **IMPORTANT**
> If you lose the phone with your authenticator app, ask a Super Administrator to reset your two-step sign-in (**Reset two-step**). You can then set it up again on a new phone.

2.7 Finding your way around

The administrator home page (Dashboard)

- **To do (top of your home page):** a short list of what is waiting on you, such as places to confirm, attempts to mark, results to finalise or release, overdue invoices or assessments you can take. Select an item to go straight to it. It is empty when you are all caught up.
- **Menu (left on a computer, bottom bar on a phone):** the pages your role may use. Pages you may not use are never shown.
- **Search (top):** finds trainees, courses and certificates by name or number.
- **Moon icon:** switches between the light and dark appearance. The choice is remembered.
- **Bell icon:** your notifications, such as confirmed places, results and certificates.
- **Your initials (top right):** My profile and Sign out.

2.8 Signing out

Select your initials and choose **Sign out**. Always sign out on a shared or public computer.

3. How the platform fits together

A few ideas explain almost every screen. Learn these words and the rest of the platform follows.

Term	Meaning
Category	A group of courses, for example Safety Management Systems or Aviation Security.
Course	A subject HAAB teaches: its code, title, duration, pass mark, minimum attendance and how long its certificate stays valid. A course is the template, not a date.
Programme	One scheduled run of a course: dates, location, instructor, number of places and fee. The same course can have many programmes through the year.
Session	One class meeting within a programme (a day or half day). Attendance is recorded per session.
Enrolment (registration)	A trainee's place on a programme. It starts **Pending** and becomes **Confirmed** when HAAB confirms it.
Assessment	An examination or test linked to a course or programme, made from questions in the question bank.
Result	The outcome for one trainee on one programme, combining assessment score and attendance against the pass rules. It is **Pass**, **Fail** or **Pending**.
Certificate	The numbered, QR-verifiable proof of a pass. It may expire and can be renewed or revoked.
Client (organisation)	An employer whose staff attend training. Trainees belong to a client or are individuals with no employer.

3.1 The life of a training programme

Step	What happens	Who does it
1	The course exists in the catalogue.	Training Administrator
2	A programme is created for dates and a venue (status **Draft**).	Training Administrator
3	The programme is opened (**Open for registration**). Trainees, instructors or client administrators register people. An invoice is raised automatically.	Training Administrator, Trainees, Instructors, Client Administrators
4	Places are confirmed (**Confirmed**). If the programme is full, extra people join a waiting list.	Training Administrator
5	Registration closes, then the programme runs (**Ongoing**). Sessions are held and attendance is recorded.	Training Administrator, Instructors, Trainees
6	Assessments are taken and marked.	Trainees, Instructors
7	Results are calculated, finalised and released.	Training Administrator (a different person from the marker)

Step	What happens	Who does it
8	The programme is marked **Completed**. Certificates are issued to everyone who passed.	Training Administrator

3.2 Programme statuses

Status	Meaning	Can move to
Draft	Being set up. Only staff can see it.	Open for registration, Cancelled
Open for registration	People can register.	Registration closed, Cancelled
Registration closed	No new registrations.	Open for registration, Ongoing, Cancelled
Ongoing	Training is under way.	Completed, Cancelled
Completed	Finished. Cannot be edited.	—
Cancelled	Called off. Registrations are cancelled and unpaid invoices cancelled. A reason is required.	—

3.3 Enrolment statuses

Status	Meaning
Pending	Registered, waiting for HAAB to confirm the place.
Confirmed	The place is held. The trainee can see the schedule, learning materials and attend.
Waitlisted	The programme is full. If a place opens, the first person on the waiting list becomes Pending automatically.
Completed	The programme finished.
Cancelled	Withdrawn or cancelled, with a reason.
No-show	Did not attend.

4. Training administrator guide

Training Administrators run the day-to-day business. Most of this chapter also applies to the Super Administrator.

4.1 The dashboard

The dashboard gives a live picture of the training business: total trainees, active courses, upcoming and ongoing training, completions, certificates issued, certificates expiring within 60 days, pass rate, hours delivered, revenue this year and outstanding payments. Charts show registrations over the last 12 months, certificates by category, billing and trainees by organisation.

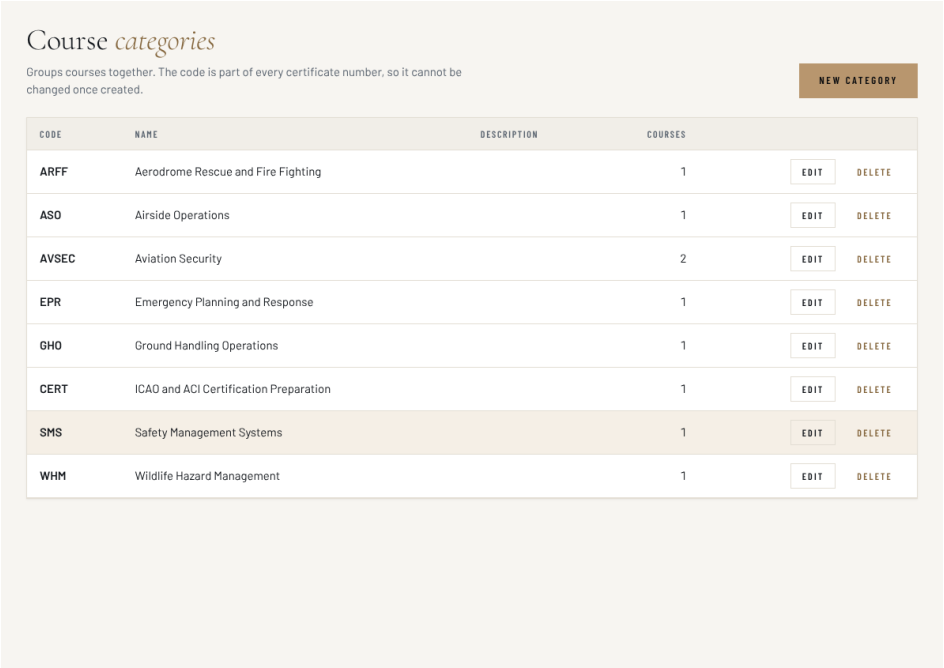

The dashboard

4.2 Course categories and the catalogue

Categories

Open **Courses → Categories**. Each category has a name and a short code. The code is used in certificate numbers (for example **ATMP-2026-SMS-000001**). Select **New category** to add one. A category with no courses can be deleted. If it still has courses, you can delete it together with its courses, but only when none of them has programmes, certificates or assessments.

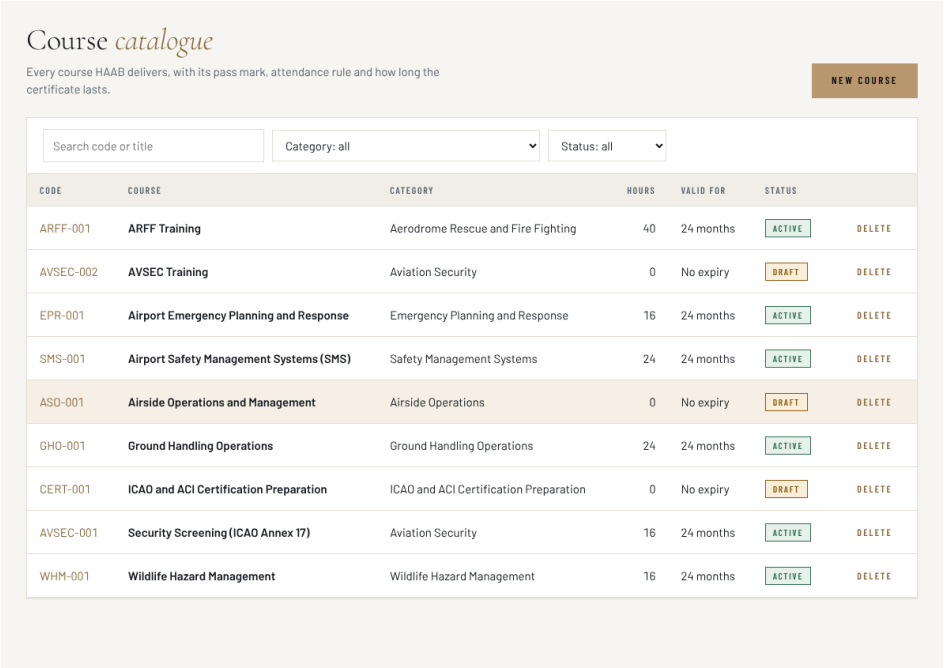

Course categories

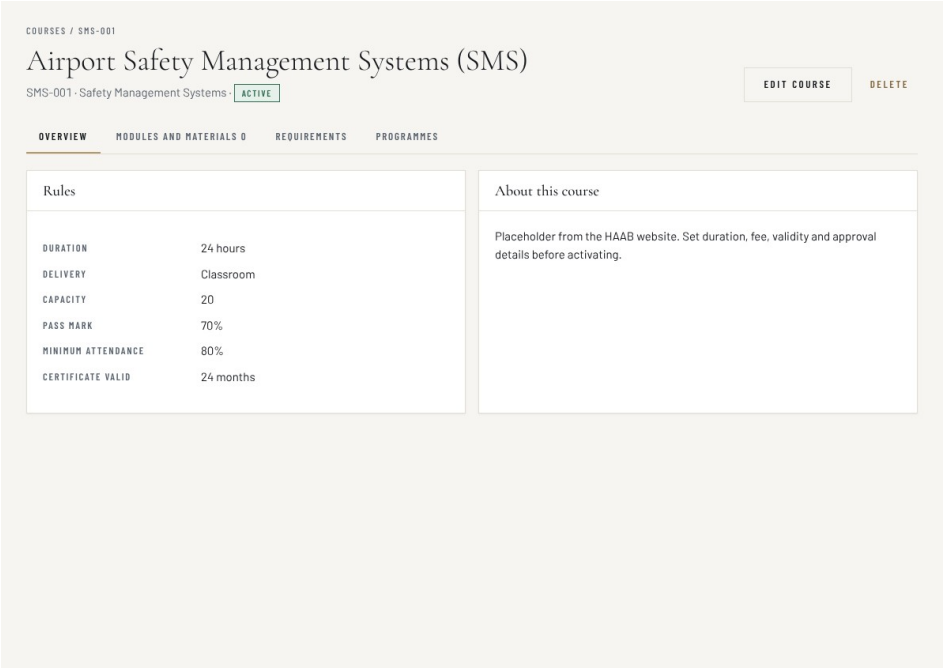

Courses

1. Open **Courses → Catalogue** and select **New course**.
2. Enter the **code**, **title**, **category**, **duration in hours**, **pass mark**, **minimum attendance** and how many **months the certificate stays valid** (leave empty for a certificate that never expires).
3. Add a description and, if you wish, **modules** (the topics covered). Modules appear on the certificate.
4. Set the course **Active** when it is ready (new courses start as **Draft**). A programme can only open for registration for an active course.

> **COURSE FEES**
> Fees are kept in the system but the catalogue does not show them by default, because client organisations carry the cost of their trainees. A Super Administrator can show them again under **System setting → Course Fees**. The amount billed always comes from the programme (see 4.3).

The course catalogue

A course page with its modules, programmes and learning materials

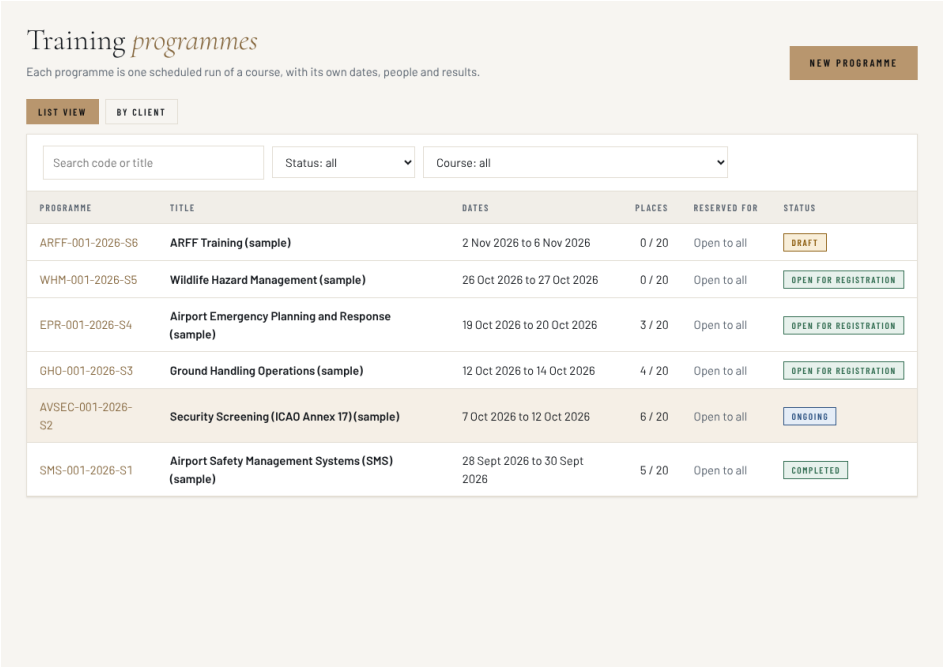

DELETING COURSES

Select **Delete** on a course to remove it together with its modules, question bank and requirements. This cannot be undone. A course that has programmes, certificates or assessments cannot be deleted by a Training Administrator because it is part of the training record. The platform refuses and tells you why. Archive it instead: open **Edit course** and set the status to **Archived**. A Super Administrator can delete a course together with its programmes, registrations and assessments (useful for clearing demo data), but never one with an issued certificate, a finalised result or a recorded payment.

4.3 Programmes

Creating a programme

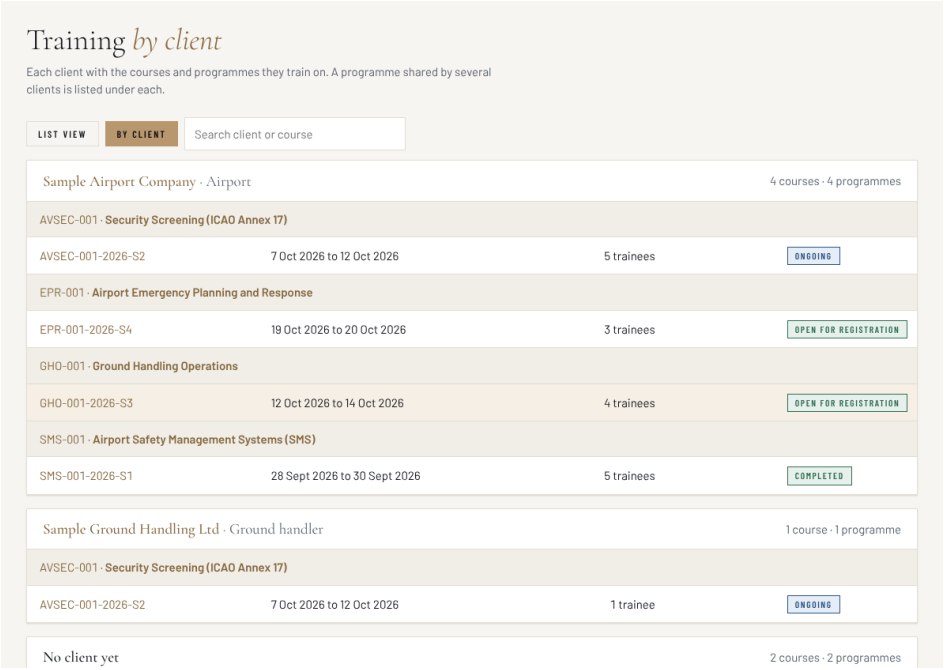

1. Open **Programmes → Programmes** and select **New programme**.
2. Choose the **course**, then set the **start and end dates**, **location**, **delivery** (classroom, online, on site), **lead instructor**, **fee** and **capacity**.
3. To reserve a programme for one client, choose the **organisation**. Otherwise it is open to everyone.
4. Select **Save**. The programme is a **Draft**.
5. On the **Sessions** tab select **Add session** for each class meeting, with its date, time and room.
6. When ready, select **Open registration**.

The programmes list

Programmes by client

Above the programmes list, choose **By client** to see the same programmes grouped by organisation. Each client appears as a card with the courses it trains on and, under each course, its programmes with dates, status and how many of that client's trainees are registered. A programme belongs to a client when it is reserved for them or when they have trainees on it. A programme shared by several clients is shown under each. Programmes with no client yet are listed last under **No client yet**. Use the search box to find a client or course. Client administrators see this view for their own organisation only. Choose **List view** to go back.

Programmes grouped by client

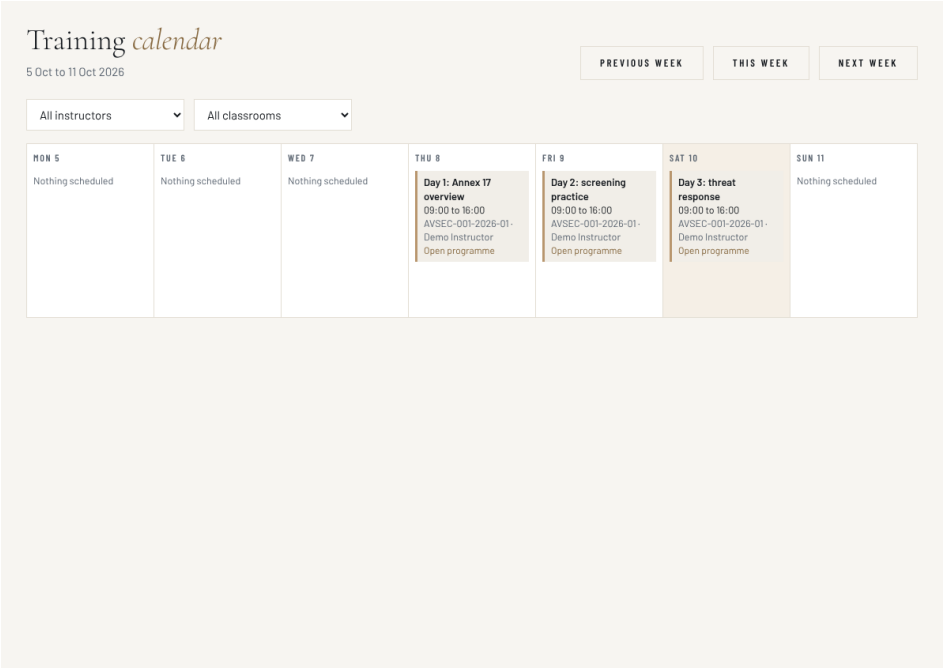

Running a programme

Use the buttons at the top of a programme to move it through its statuses (see 3.2): **Open registration**, **Close registration**, **Reopen registration**, **Start programme** and **Mark completed**. Marking a programme completed completes every confirmed enrolment. **Cancel programme** requires a reason, cancels all registrations and cancels unpaid invoices.

> **IMPORTANT**
> Once a programme has registrations you can no longer change its fee, and capacity cannot be set below the number of places already held.

Calendar and classrooms

Programmes → Calendar shows all sessions by day, week or month. **Programmes → Classrooms** manages rooms and their capacity, so the platform can warn you of a double booking.

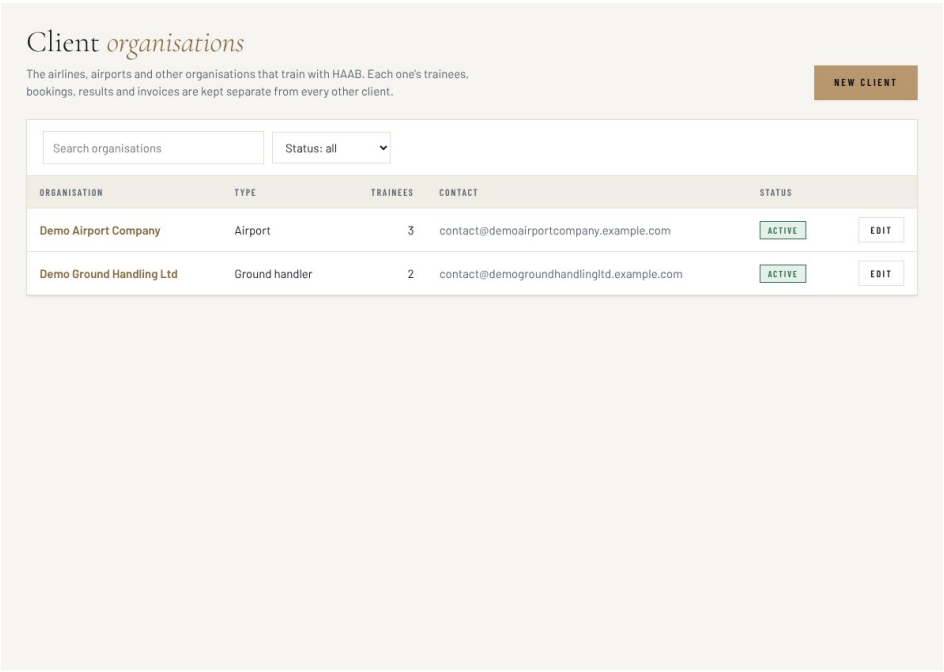

The training calendar

4.4 Trainees and clients

Clients (organisations)

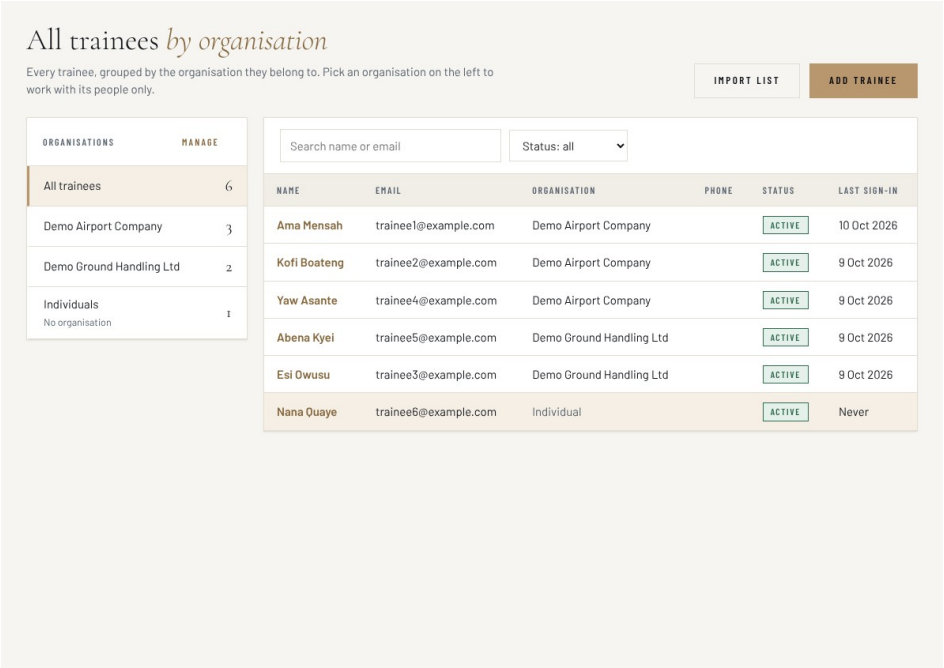

Open **Clients** to add an employer, with its contact details. Select a client to see its trainees, registrations, invoices and compliance.

Clients

Adding one trainee

1. Open **Trainees → All trainees** and select **Add trainee**.
2. Enter the full name and email. Optionally add phone, organisation (leave empty for an individual), aviation role and employer. Save.
3. The trainee receives an invitation email to set a password.

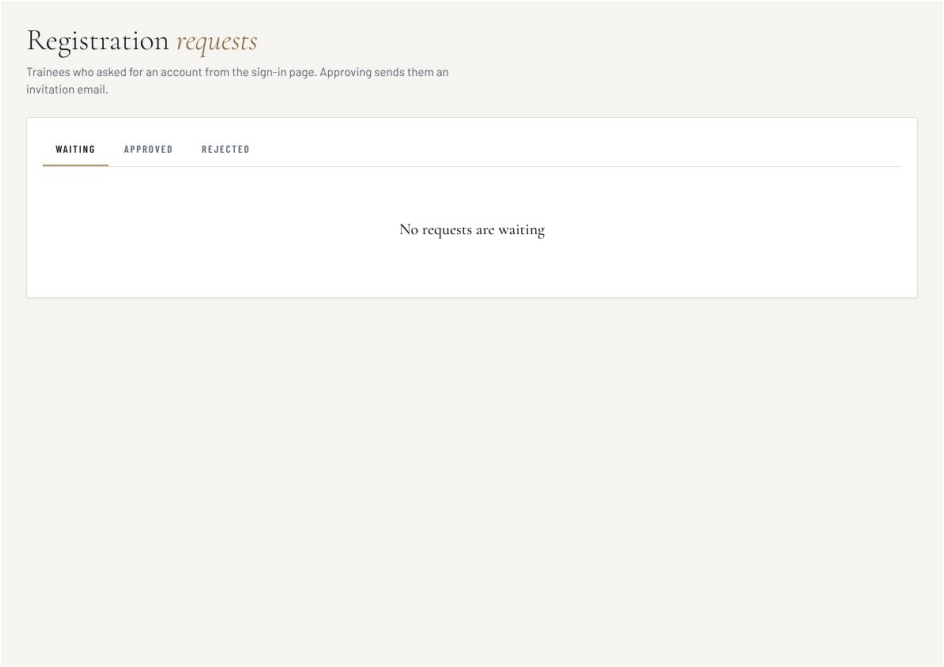

Trainees grouped by organisation

Adding many trainees

Use **Trainees → Import from Excel** (or **Import list** on the trainees page). It works exactly as described in 6.7, and you can register the whole list onto any programme.

Registration requests

If self-registration is switched on, new requests appear under **Trainees → Registration requests** (the page also shows a count). Open the **Waiting** tab, then **Approve** or **Reject** each one. Approving sends the invitation email. Rejecting asks you for a reason.

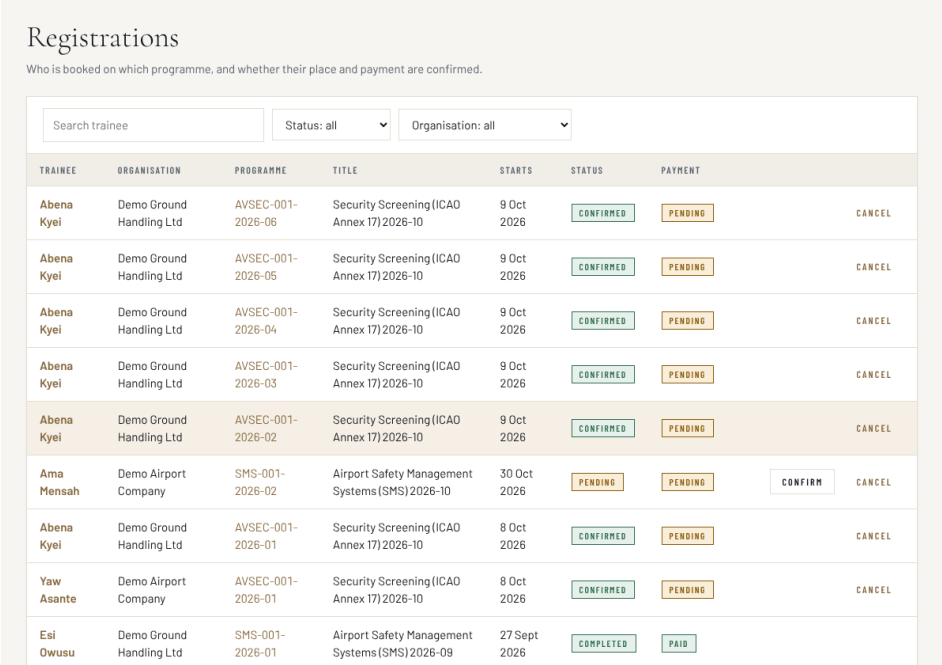

Registration requests

Instructors

Open **Instructors** and select **Add instructor** to record an employee or contract associate who delivers training. An instructor can only be scheduled for courses they are authorised for, and only while their authorisation is current.

4.5 Enrolments

Open **Enrolments** to see every registration, filtered by programme, status or organisation.

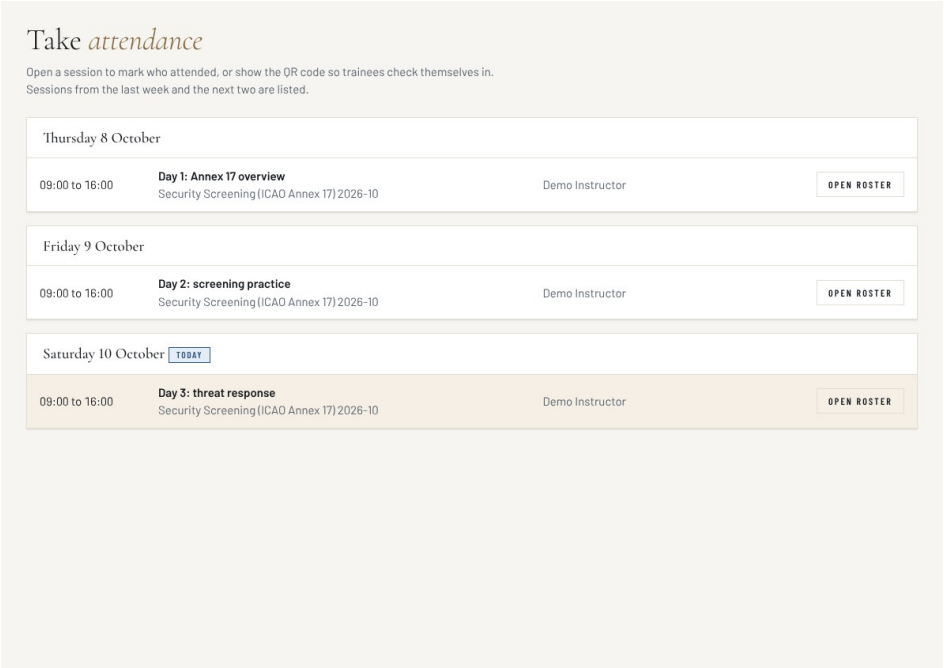

Enrolments

1. To confirm a place, select **Confirm**. The trainee is notified. A programme that is already full will not accept more confirmations without a recorded reason.
2. To cancel, select **Cancel** and give a reason. An unpaid invoice is cancelled with it. A paid invoice is left for Finance to refund deliberately.
3. To register trainees yourself, open the programme, go to the **Registrations** tab and select **Register trainees**. Tick as many people as you need.

> **RULE: PAYMENT BEFORE CONFIRMATION**
> If the setting **Require payment before confirming a place** is on, a place can only be confirmed once the invoice is paid. Places sponsored by a client are exempt.

4.6 Attendance

Administrators can view and correct attendance for every session, as described in 6.3. Corrections are recorded in the audit log.

Attendance

4.7 Assessments, marking and the question bank

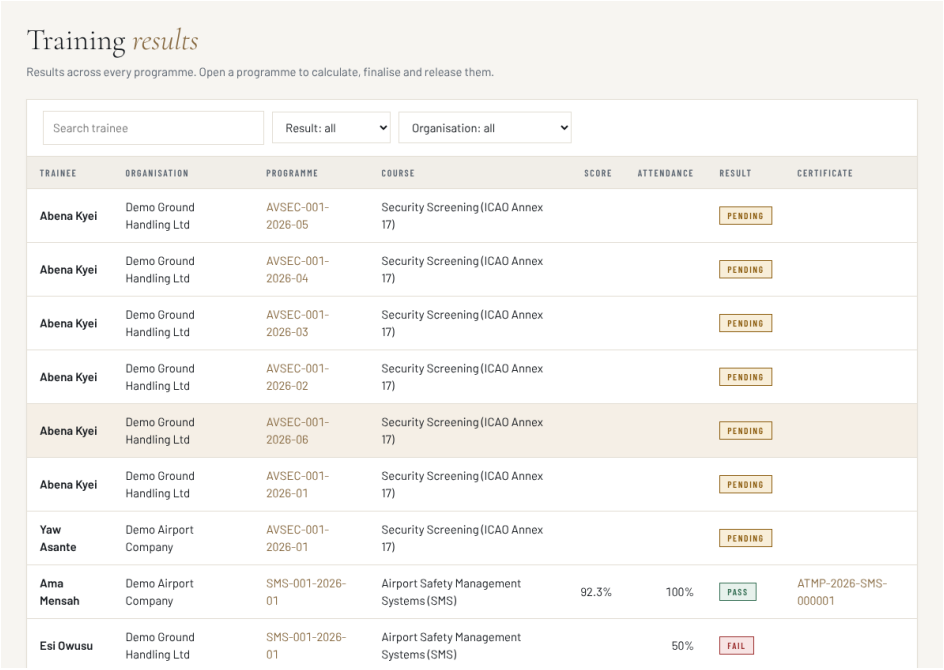

Administrators have the same tools as instructors (see the Instructor Manual) and can also finalise results.

4.8 Results

Open the programme and select its **Results** tab. At the top is the **Close-out checklist**. It shows where the programme stands (programme completed, attendance recorded, assessments marked, results calculated, finalised, released to trainees) and offers one button for the next step:

The checklist says	The button does
Programme completed is not done	Mark programme completed. This calculates every result. (Start the programme first if it has not started.)
Attempts are waiting to be marked	Open the marking queue, filtered to this programme.
Results are not calculated	Recalculate results.
Results are ready to finalise	Finalise and release all ready results. Anything that cannot be finalised, for example because you marked that trainee's work, is reported with the reason.
Finalised results are not released	Release results to trainees.

The list below the checklist shows each trainee. Under a **Pending** result a line says why it is still pending.

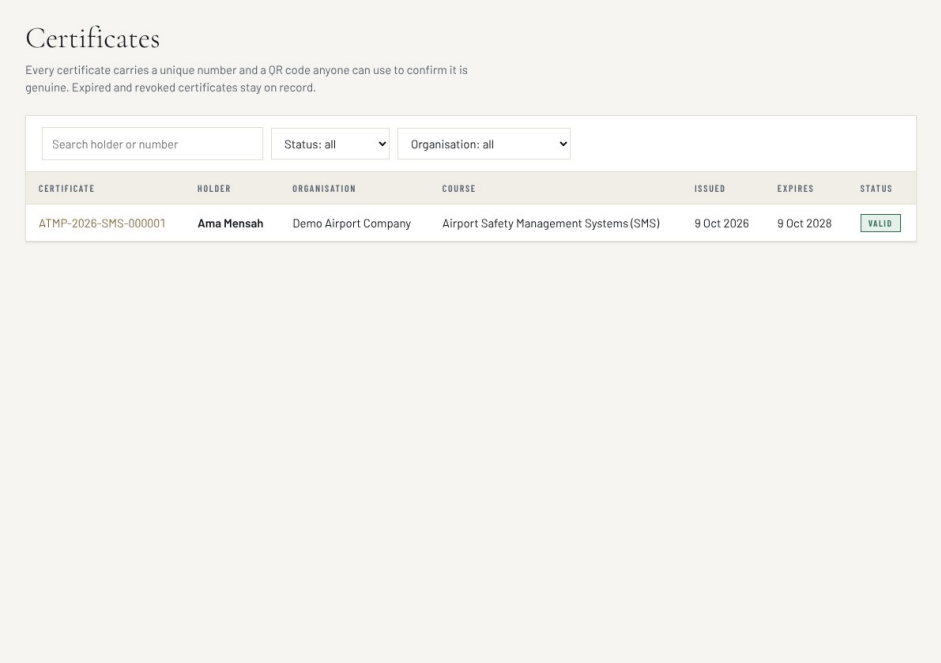

Training results

1. Marking the programme **Completed** calculates every result straight away, even if some session dates have not been reached. Sessions that were never held are not counted against anyone.
2. Select **Recalculate results** to compute each trainee's result from their assessment score and attendance. It can be repeated until results are finalised.
3. Review the list. A trainee **passes** only when both the pass mark and the minimum attendance are met.
4. Select **Finalise** on a result, or **Finalise all ready results** for the programme. Finalising locks the result and, for a pass, **issues the certificate automatically**. A result that cannot be finalised is reported with the reason.
5. Select **Release results** to make finalised results visible to trainees. The **State** column shows **Draft**, **Final** or **Released**.

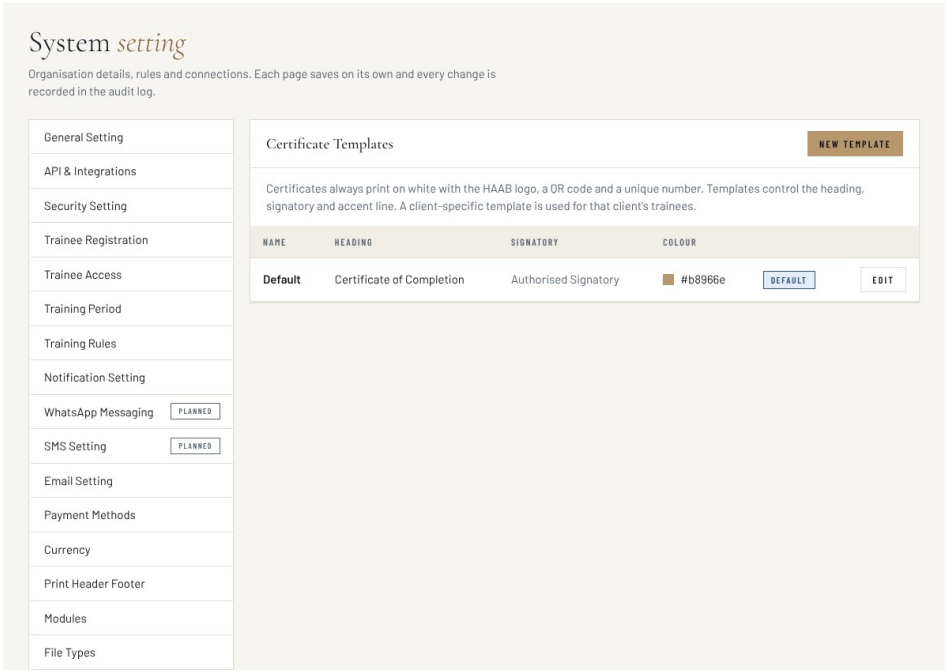

> **IMPORTANT**
>
> A finalised result can only be changed through a formal override (the **Change** button), with a reason. The override is recorded in the audit log together with the original value. A different person from the marker must finalise.

4.9 Certificates

The certificate register

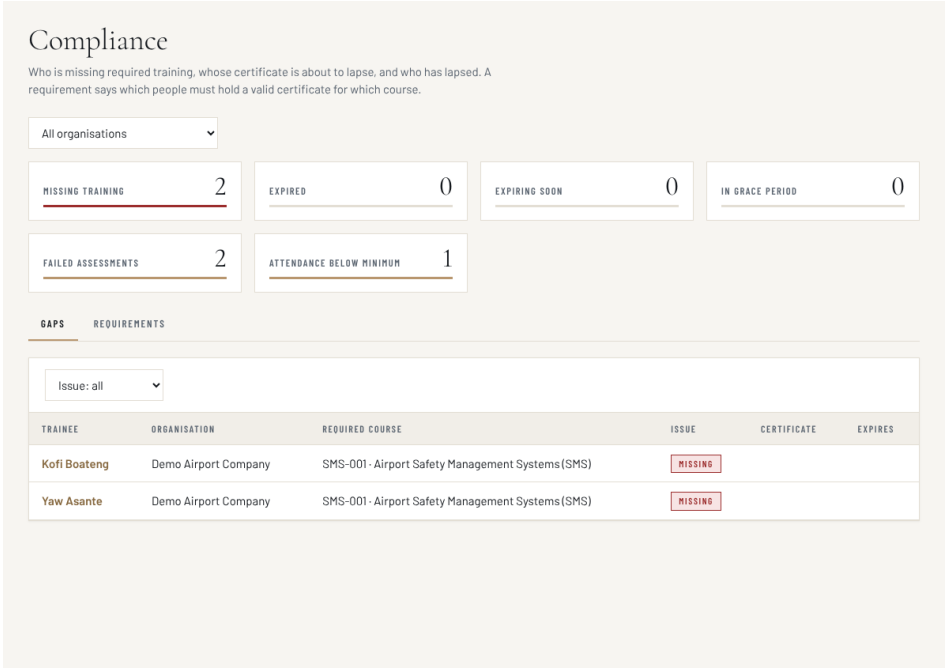

- **Download PDF** gives the certificate as a PDF.
- **Revoke** a certificate if it must be withdrawn. A reason is required, it stops verifying straight away, the trainee is notified, and it stays on record marked **Revoked**.
- **Reissue** revokes the current certificate and issues a new one under a new number, for example to correct a spelling mistake.
- **Renewal:** when a trainee passes the same course again, the new certificate is linked to the previous one.
- **Expiry:** certificates show **Expiring soon** within the number of days set in Training Rules, and the trainee and employer receive reminders.
- **Templates:** open **Certificates → Templates** to change the heading, signatory name and title, footer and accent colour.

Certificate templates

4.10 Compliance

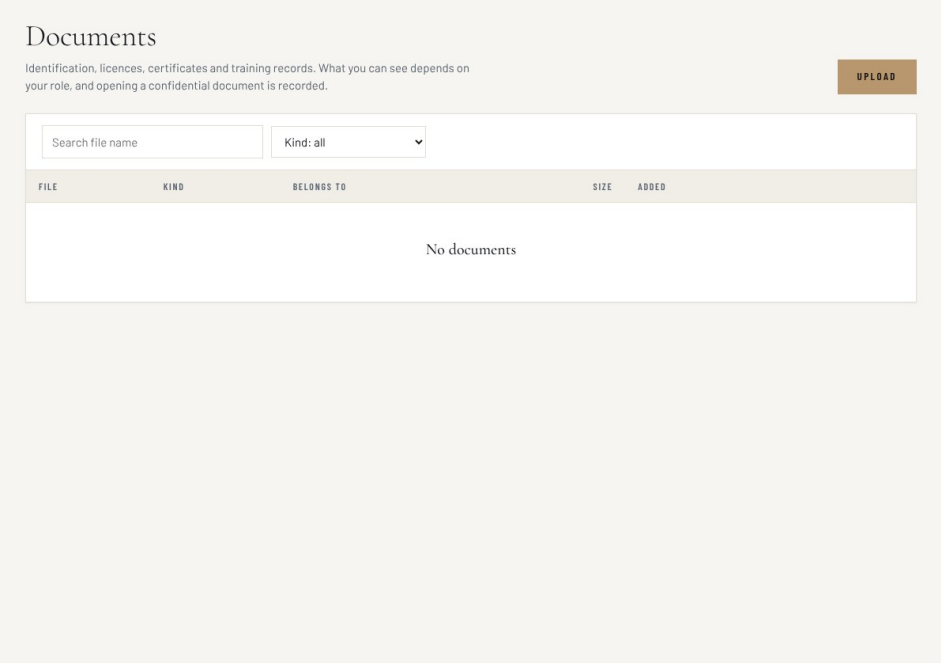

Compliance shows who is missing required training, whose certificate is about to lapse and who has lapsed. A **requirement** says which people must hold a valid certificate for which course. On the **Requirements** tab select **Add requirement**, choose the course, who it applies to (everyone or one organisation), optionally an aviation role such as Ramp agent, and a grace period in days. The **Gaps** tab then lists everyone who is **missing**, **expired**, **in grace** or **expiring soon**, and can be filtered by issue.

Compliance overview

4.11 Documents

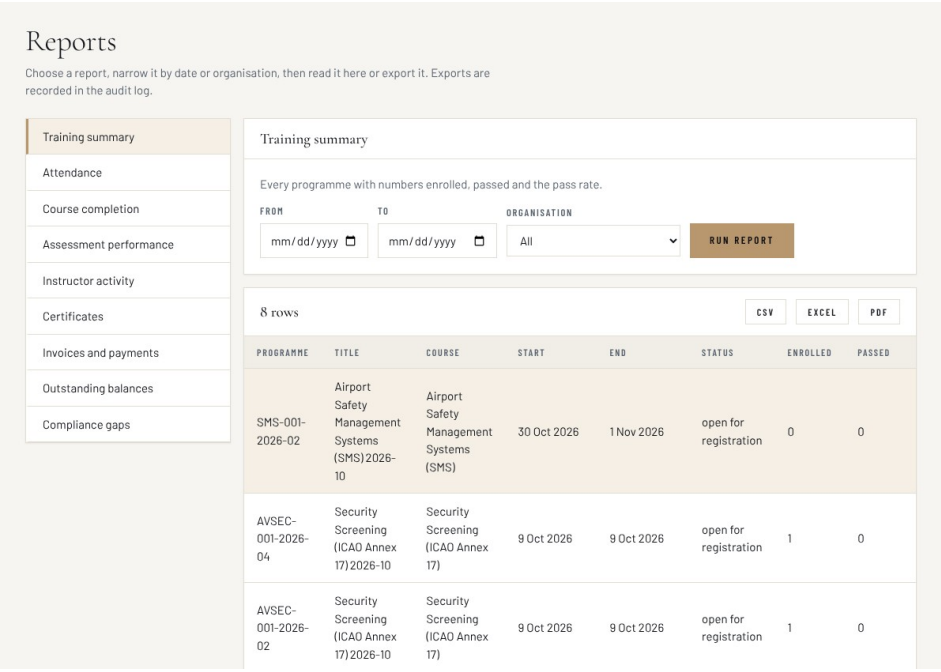

Documents stores identification, licences, certificates and training records. What you can see depends on your role, and opening a confidential document is recorded. Select the upload button, choose the file and the record it belongs to. Allowed file types and the largest file size are set by the Super Administrator.

Documents

4.12 Reports

Open **Reports**, choose a report, narrow it by date or organisation, and select **Run report**. Export to **CSV**, **Excel** or **PDF**.

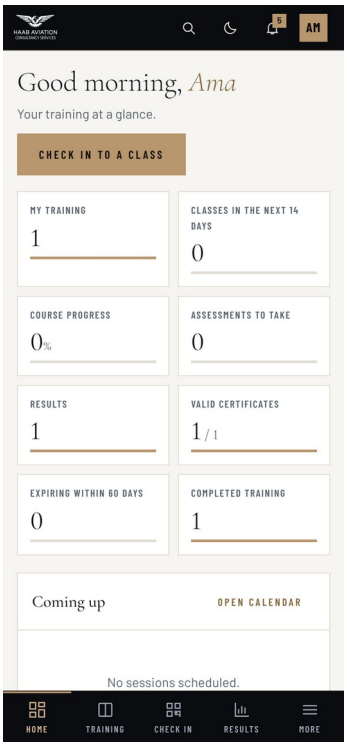

Reports

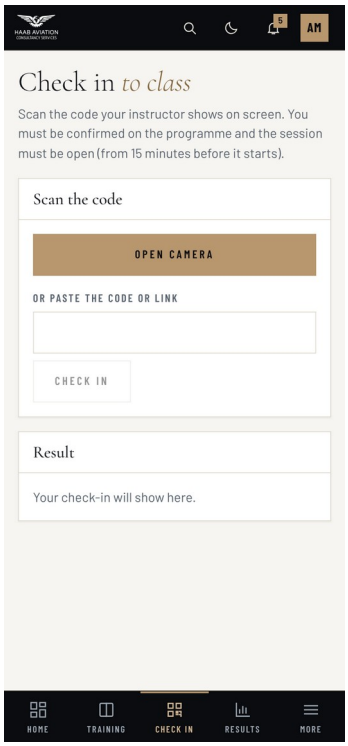

Report	Shows
Training summary	Every programme with numbers enrolled and passed.
Attendance	Attendance by trainee and programme.
Course completion	Completions by course and organisation.
Assessment performance	Scores, pass rates and question difficulty.
Instructor activity	Sessions taught and hours delivered.
Certificates	Issued, expiring, expired and revoked.
Invoices and payments	Billing and receipts.
Outstanding balances	Unpaid amounts by client.
Compliance gaps	Who is missing mandatory training.

5. Using the platform on a phone

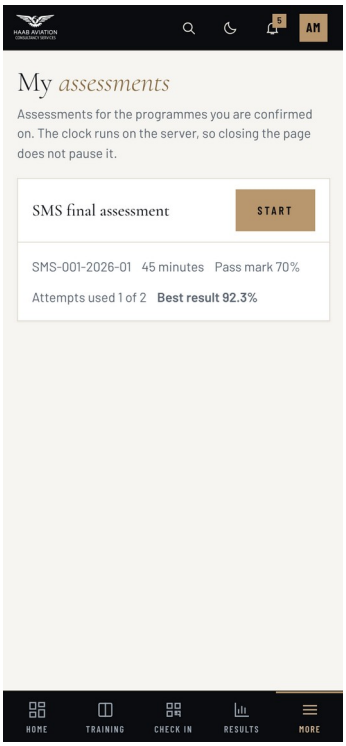

The platform is designed to feel like an app on a phone. The same address works on a computer and a phone, and the layout adapts.

Trainee home

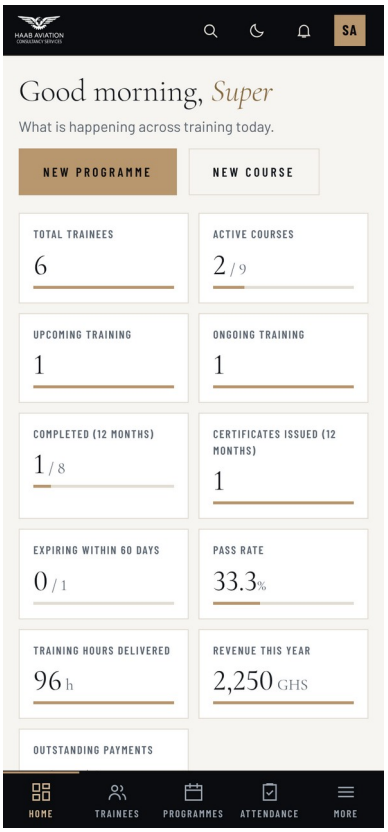

Check in

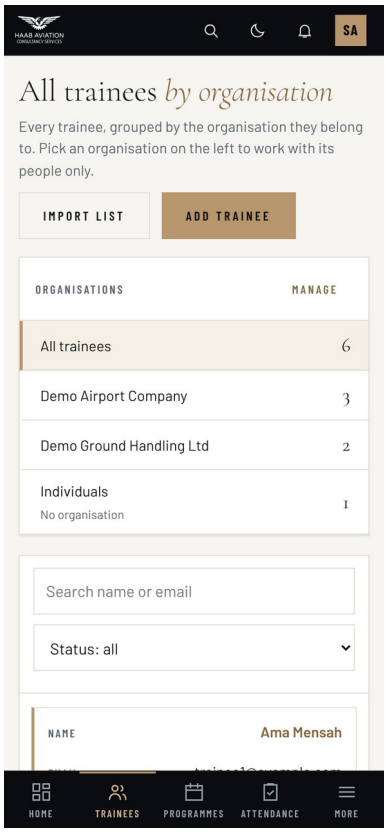

Assessments

5.1 What changes on a phone

- The menu moves to a **bottom bar** with the four things your role does most. **More** opens the full menu.
- Tables become **cards** so nothing needs sideways scrolling.
- Filters and forms open in **sheets** that slide up from the bottom.
- Buttons are larger for touch.

Administrator home

Trainees as cards

5.2 Adding the platform to your home screen

Once added, the platform opens full screen with its own icon, like an installed app, and you do not need to type the address.

Phone	Steps
iPhone (Safari)	Open the platform, tap the **Share** button, choose **Add to Home Screen**, then **Add**.
Android (Chrome)	Open the platform, tap the ⋮ menu, choose **Install app** or **Add to Home screen**.

> **TIP**
> Allow camera access the first time you check in, so scanning works. If you refused it by mistake, enable it again in your browser's site settings.

6. Troubleshooting and questions

Problem	What to do
I did not receive my invitation or reset email.	Check spam or junk. Wait a few minutes. Then ask your administrator to send a new link (**Reset password**), or use **Forgotten your password?**.
The invitation link says it has expired.	Links expire for your safety. Use **Forgotten your password?** with the same email address, or ask your administrator for a new link.
My password was refused.	Use at least 12 characters. A phrase of several words is easiest.
I am blocked after wrong passwords.	Wait a few minutes, then sign in again, or reset your password.
I lost my phone with the authenticator app.	Ask a Super Administrator to use **Reset two-step** on your account, then set it up again.
I cannot see a menu item I expected.	Menus follow your role. If you believe you need access, ask your administrator. For trainees, Finance can be switched off.
My registration is still Pending.	HAAB has not yet confirmed your place. If payment is required first, it will be confirmed once payment is recorded.
The assessment says "Not open yet".	It has an opening time. Come back at that time. Instructors can change it under **Opening times**.
I cannot check in.	Check that your place is **Confirmed**, that the session is within 15 minutes of starting or running, and that you have the right session QR code. Otherwise ask the instructor to mark you present.
I submitted my assessment but see no result.	Results appear after marking, finalising and release. Written answers are marked by hand, so this can take time.
I cannot delete a course.	It already has programmes, enrolments or certificates. Archive it instead.
Excel import says a row failed.	Read the reason shown next to the row. The most common are a missing name, an invalid email, or an email that already has an account.
The certificate says Revoked or Expired.	Contact HAAB. Expired certificates can be renewed by attending the course again.
The page looks wrong or will not load.	Refresh the page. Try another browser. Make sure your device date and time are correct. If it persists, contact support with the time and a screenshot.

6.1 Getting help

For help with accounts, programmes or certificates, contact the HAAB training office using the contact details in your invitation email or on your certificate. For faults in the platform itself, contact your system administrator, who can reach the platform's technical support.

6.2 Keeping your account safe

- Never share your password or your six-digit code, and never give them to anyone who contacts you. HAAB staff will never ask for them.
- Use a long, unique password. Consider a password manager.
- Switch on two-step sign-in if you handle results, money or people's records.
- Sign out on shared computers.

7. Glossary

Term	Meaning
Audit log	A permanent, tamper-evident record of who did what and when.
Authenticator app	A phone app that generates the six-digit code for two-step sign-in.
Capacity	The number of places on a programme.
Check-in	A trainee recording their own attendance by scanning the session QR code.
Client	An employer that sends staff for training. Also called an organisation.
Enrolment	A trainee's registration on a programme.
Finalise	To lock a result so it is official. A pass then issues a certificate.
Marker	The person who marks written answers.
Minimum attendance	The percentage of sessions a trainee must attend to pass.
Override	A controlled, recorded change to a finalised result, with a reason.
Pass mark	The percentage score a trainee must reach to pass.
Programme	One scheduled run of a course.
Question bank	The library of reusable examination questions.
Release	Making a marked result visible to the trainee.
Revoke	To withdraw a certificate. It remains on record.
Session	One class meeting within a programme.
Sponsored	A place paid for by a client organisation rather than the trainee.
Waiting list	Trainees queued for a place on a full programme.

Appendix A. Word layout for importing questions

Write one question after another. A question starts with a number. Options are lettered. Add an **Answer** line. Other lines are optional. Leave a blank line between questions. Download the ready-made template from the **Import from Word** window.

Question type	How to write it
Multiple choice, one answer	1. Which ICAO Annex covers aviation security? A. Annex 6 B. Annex 17 C. Annex 14 Answer: B

Question type	How to write it
Several correct answers	2. Which are hazards on the apron? A. Jet blast B. Fuel spill C. Clear weather Answer: A, B
True or false	3. Screening is only needed for international flights. Answer: False
Short answer	3. Name the Annex that covers aviation security. Answer: Annex 17 | Annex seventeen
Essay (marked by hand)	5. Describe the steps for resolving a screening alarm. Type: Essay Marks: 6

- **Marks:** optional, for example `Marks: 2`. The default is 1.
- **Topic** and **Explanation:** optional lines. Explanation is shown to trainees after marking where results are released.
- A correct option can also be marked with a `*` at the end of the line.
- Lines such as `Level:` are ignored. A file can hold up to 500 questions.
- The file must be a Word **.docx**. In Word choose File, Save As, Word Document.

Appendix B. Excel layout for registering trainees

Column	Required	Notes
Full name	Yes	As it should appear on the certificate.
Email	Yes	One account per email address. Must be unique across the platform.
Phone	No	Include the country code.
Job role	No	For example Ramp agent.
Employer	No	Free text. The organisation you choose in the window is what links the trainee to a client.

Keep the heading row. The first sheet is read. A file may hold up to 500 trainees and 5 MB. The platform checks the whole file first and reports every problem before anything is created.

Appendix C. Certificate numbers and verification

Certificate numbers follow the pattern **ATMP-year-CATEGORY-serial**, for example **ATMP-2026-SMS-000001**. Each certificate carries a QR code and a verification address of the form `https://<platform address>/verify/<token>`. Anyone can open it without signing in to

confirm the holder, course, issue and expiry dates and whether the certificate is currently valid, expired or revoked. Only these facts are shown.
